**Subject:** RE: Another UI idea - grouping/ungrouping zones

2. Allow a user to save Zone Profiles (as requested by Tom and others). This would allow a user with one click to put their Zones into predefined groups (think Party-mode, but instead off linking all Zones, certain Zones get grouped). Tom has the experience that he ends most evenings in Party Mode - but most mornings, he wants to link all the 'living spaces', but ungroup the bedrooms (or words to that effect).
